

Respond Systems Joins Chester Weber's Team of Sponsors

Ocala, FL – Respond Systems, makers of the Sentry PEMF Blanket, are pleased to announce that they have joined World Champion Silver medalist Chester Weber and his team as an official sponsor. The Combined Driver's team of Four-In-Hand horses relies on the Bio-Pulse Standard and the Sentry blankets by Responds Systems to stay in top condition.

"My horses work very hard with their backs and in order to stay in top condition I rely on the blankets to help keep my team at the top of their game. The Sentry and Bio-Pulse utilize pulsing coils that are built into a well-fitted sheet that covers major joints and muscles, so that all of the critical joints and muscles are treated quickly," Weber said.

Weber, who is working toward his goal of qualifying for the 2010 World Equestrian Games, started the year off right by winning the FEI division for Four-In-Hand horses at the Sunshine State FEI Combined Driving Event held at the Florida Horse Park in Ocala. The year also started nicely for all of Team Weber, when Weber was named an Equestrian of Honor by the United States Equestrian Federation and his star horse Jamaica was named the USEF Horse of the Year, the highest honor in the horse industry.

"Horses that are part of a combined driving team are athletes that work extremely hard, and my horses are no exception. I take the statement 'no foot, no horse' and 'no back, no horse' to heart which is why I use the Sentry PEMF Blanket on my team," Weber said. "The blankets generate healing therapeutic magnetic fields that are safe, have no side effects, and treat sore backs, sore muscles and stiff, arthritic joints."

Respond Systems is an important part of an impressive "sponsorship team" that accompanies Weber as he successfully tours and competes. "Respond and Chester Weber have been teamed together since 1998 with our PEMF and laser equipment. We are thrilled that his horses will now be kept fit and healthy with our new Sentry system and we look forward to their continued accomplishments in this very competitive sport," said Doreen Hudson of Respond Systems.

Weber is an influential representative for his sponsors, bringing attention of their products to combined driving enthusiasts, professional whips and trainers. Weber's outstanding record, both in the United States and in Europe, makes him uniquely qualified to represent Respond Systems throughout the industry and the world.
