

# Equine Services Becomes Partner In Performance With Combined Driver Chester Weber

Ocala, FL (September 8, 2009) – Equine Services has partnered with world famous combined driver Chester Weber, as Weber prepares for the United States National Combined Driving Championships. Weber’s goal to win the United States Combined Driving title would earn him an unprecedented seventh consecutive win, a victory that Weber views as a stepping stone for the 2010 World Equestrian Games.

“In order to stay on top and win the National title, as well as qualify for WEG, my horses need to perform at their peak, and partnering with Equine Services allows my horses to do just that,” Weber said. “Equine Services’ supplements are designed for world-class equine athletes and I feel confident my team benefits from them.”

Dr. Haynes Stevens, of Equine Services LTD, Inc., is equally pleased to partner with Team Weber. “Nine years ago I developed a line of supplements in conjunction with a pharmacist, nutritionist, herbalist and several sports medicine doctors from Northwestern University,” Stevens said. “Chester’s team has already proven they are the best, and our line of high performance supplements are a fantastic addition to Team Weber’s program.”

The high performance supplements Weber uses from Equine Services includes Fibro-Ten, Bio-Performance, Bio-Relief and Bio-Sed. Fibro-Ten focuses on soft tissue and the product has the most concentrated, highest percentage of omega fatty acids designed to improve and maintain the well being of connective tissue, specifically tendons and ligaments. Bio Performance focuses on increasing and repairing muscle mass. “Bio Performance has the highest level of herbal anabolic ingredients and amino acids used to offset physical stress and drain associated with high energy competition

and training,” Stevens said. “There is no testing withdrawal needed with this supplement.”

Weber also uses Bio-Relief, an all-natural amino acid, vitamin and herbal supplement designed to reduce inflammation. Bio-Relief is safe for use in FEI competition horses. Bio-Sed helps horses with anxiety relief, which helps horses focus on competition. “The all-natural amino acid, vitamins and herbs relieve anxiety and help calm a horse,” Stevens said.

Weber’s champion team uses the supplements designed by Stevens, who is a veterinarian and also an accomplished horseman. The combination gives Stevens the unique perspective to treat competition level horses through diagnostic and medical therapy along with focused training and work programs.

Weber’s own dedication to focused training has made him a force to be reckoned with in combined driving. In addition to being the six-time U.S. National Combined Driving Champions, Weber made history in 2008 when he became the first American to win an individual medal in the Four-in-Hand FEI World Driving Championships in Beesd, The Netherlands. Weber was also named a 2008 Equestrian of Honor by the USEF and his horse Jamaica earned the USEF Horse of the Year title for 2008.

“Team Weber has had great success in the past, and we look forward to being part of their success in the future,” Stevens said. “Chester has accomplished more in the field of combined driving than many athletes ever do, and we are excited to be along for the ride.”
